## **About Rotary Gate Systems**

Rotary Gate Systems, Inc., based in Pensacola, FL., began manufacturing gate operators in 2003. The company worked closely with installers in the Florida panhandle and southern Alabama to ensure the quality and reliability of its products before offering them to dealers across the country in 2008. Since then, RGS operators have been installed at private homes, colleges, gated communities and apartments as well as industrial and military installations from Massachusetts to California. The RGS SL -1000 commercial operator has been selected by the Florida National Guard and the United States Air Force Academy for use on Crash Gates.

Rotary Gate Systems operators are sold only through qualified dealers and distributors. For more information on our operators or truck assemblies, call 877-331-4747 or visit [www.RotaryGateSystems.com](http://www.RotaryGateSystems.com).
